## PROJECTS

---

GITHUB - <https://github.com/Madhav-Aman>

### Project 1

Travel Website | Front-End

- Built a front-end travel website in React-JS.
- In this website we re-use functional components and pass properties down to those components.
- HTML, CSS, JavaScript, React-Js, React-Hooks etc.

### Project 2

TRUTH DARE GAME

- Created using flutter framework,
- Random string dependency was used for randomly picking the questions and dare,
- User can also add their list of questions and dare.

### Project 3

E-COMMERCE WEBSITE - ANON

- Developed a simple E-Commerce web based application which allows user to buy any product from sure Shop.
- allows user to add their product into cart. It has proper Authentication and Authorization system.
- Languages and Technologies used : HTML, CSS, Javascript, Bootstrap etc.

## ACHIEVEMENTS

---

Hacker-Rank | **Certifications**

- **Java**
- **Python**
